

LEATHER

MATERIALS WITH CHARACTER. SURFACES WITH DISTINCTION.

Leather and synthetic leather derive their distinctive appeal from the surface. It defines a product's character, creates a unique tactile experience and makes quality visible. Whether in automotive interiors, fashion or premium lifestyle products, texture and material appearance shape the first impression and the overall product experience. Using state-of-the-art engraving technologies and the highest level of precision, we develop customized grain patterns and surface structures for a wide range of applications. Working closely with our customers, we create solutions that combine design, functionality and authentic material appearance in premium-quality surfaces. The result is surfaces that make premium products truly distinctive.

GRAIN PATTERNS & SURFACE STRUCTURES

From natural leather grains to customized design structures, we develop surfaces that create an authentic material appearance and give products a distinctive identity.

HAPTICS & DESIGN

A surface is not only seen – it is experienced. Our structures combine design, tactile quality and material appearance to create a premium product experience.

DESIGN DEVELOPMENT

Working closely with our customers, we develop customized grain patterns and surface structures that reflect current design trends and give materials their distinctive character.

ENGRAVING TECHNOLOGIES

Laser, chemical etching and direct engraving technologies enable the production of highly precise embossing rollers with exceptional detail. The result is surfaces that meet the highest standards of appearance, tactile quality and repeatable quality.

MATERIAL EXPERTISE

Every material has its own unique character. Drawing on our expertise, we develop surfaces that authentically reproduce natural leather grains or create customized structures with an exclusive material appearance.

APPLICATION EXPERTISE

Our surfaces are used wherever quality, comfort and design make the difference – from automotive interiors and fashion to furniture, aviation and premium lifestyle products.
