Design & Technology

Design that inspires. We combine creativity with precision. Down to the finest detail.

Consulting

We attach great importance to customer proximity. In personal meetings we advise our customers in all process stages, define relevant target markets and identify solutions for individual requirements.

Development & Design

The creative implementation of our surface designs is made by experienced designers and experts in consideration of all relevant technical details.

Reproduction

The unique blend of modern technology and traditional craft enables us to reproduce and individually adapt customer templates down to the last detail.

surface solutions – from an idea to the final product

Technology that drives. We focus on technical expertise and high quality. In each of our production steps.

Rollers & steel core production

For decades we have been producing printing and embossing rollers for a wide variety of applications as well as steel cores and sleeves especially designed for rotogravure printing.

Engineering

We are experts in complex manufacturing and production processes, high-precision calender technologies as well as roller and sleeve systems.

Technical consulting

We provide tailored technical consulting and offer our customers individual solution proposals – goal-oriented and competent.

On-site service

Whether expert maintenance, roller installation, spare parts procurement or individual repair services – we also offer excellent on-site assistances to our customers.

INNOVATION

DID YOU KNOW?

Our internal R&D department is able to access a large network of international industrial partners, research institutes and universities.

Constant progress, no stagnation. Our many years of experience and expertise are supplemented by a multitude of future-oriented research projects. Together with our customers we enable a continuous enhancement in quality and productivity. With a view on the trends of tomorrow, current developments are continuously adapted to the needs of the market. We keep on moving for you.

Quality awareness at every step

Whether in individual consulting, creative design or technical implementation – we always operate at the highest level.

Excellent service, flexibility and individual solutions for our customers are the focus at all times. With a high performance orientation and clear responsibilities, we concentrate on trust and reliability. We provide our customers with competitive advantages via technological progress and act as a full-service provider. With outstanding quality awareness, we are by your side as a reliable and long-term partner.
