SAUERESSIG Group Power your Ideas

SAUERESSIG Group, as part of Matthews International Corporation, is a recognized expert for rotogravure and embossing tools, flexographic printing and special machine construction. The common umbrella brand is bringing together the business units Packaging, Surfaces, Rollers, Engineering and Elastomers.

In the SAUERESSIG Group we combine decades of experience and focus on quality, versatility and international group strength. As an industry expert for the manufacturing and engineering industries and an innovative partner for creative and digital solutions, we support our customers in all their business areas and thus actively shape the markets of today and tomorrow.

We believe in the power of new ideas. With our worldwide network, our know-how and our creativity we see ourselves as a strong partner at our customers' side.

As the leading international supplier along the pre-press stage as well as rotogravure and embossing cylinders, SAUERESSIG Surfaces offers a strong technical expertise. Within the surface sector this is based in the field of tissue and hygiene products, non-wovens as well as wood, flooring and plastics processing industry. The brand also unites a wide-ranging set of competencies in surface design. These are primarily used in the field of decor as well as in the automotive, leather or wallpaper industry.

With SAUERESSIG Surfaces, we thus combine diverse competences from all areas of surface refinement. Our combined range of products and services enables us to continuously consolidate and expand our position in the global surfaces market.

“Together with our customers we open a new chapter.”

Everyday, but never ordinary

Plastics offer countless application possibilities. For decades we have been supporting our customers with high-quality rollers for the production and refinement of plastics. In addition to their use in construction, laminate, hygiene, medical, aviation and aerospace industries, our designs can also be found in the interiors of various automobile manufacturers. We attach particular importance to meeting the high-quality standards of the industries and support our customers with professional services and flexibility. By combining our own technical centre with engraving and design know-how, we implement even the most complex processes and offer a decisive competitive advantage.

Impressive hand-made products

The successful development of new designs and a unique sample service are among our company's most important services. With experienced designers, product developers and engravers, we evolve innovative designs and support our customers in regularly reinventing themselves within the demanding brand world.

In addition to traditional craftsmanship, we use state-of-the-art laser technologies and rely on technical innovation. To us, the material characteristics of your products are just as important as the visual and haptic effects.

Did you know?

Thanks to our internal engineering expertise, we are always in a position to meet the special requirements of our customers quickly and efficiently.

Inspired by **design**. Driven by **technology**.

Design that inspires. We combine creativity with precision. Down to the finest detail.

Consulting

We attach great importance to customer proximity. In personal meetings we advise our customers in all process stages, define relevant target markets and identify solutions for individual requirements.

Development & Design

The creative implementation of your surface design is made by experienced designers and experts in consideration of all relevant technical details.

Layouts

We support our customers through their own decision-making process with digital layouts and 3D prints to achieve the preferred design.

Technology that drives. We focus on technical expertise and high quality. In each of our production steps.

Rollers & steel core production

For decades we have been producing printing and embossing rollers for a wide variety of applications as well as steel cores and sleeves especially designed for rotogravure printing.

Technical consulting

We provide tailored technical consulting and offer our customers individual solution proposals – goal-oriented and competent.

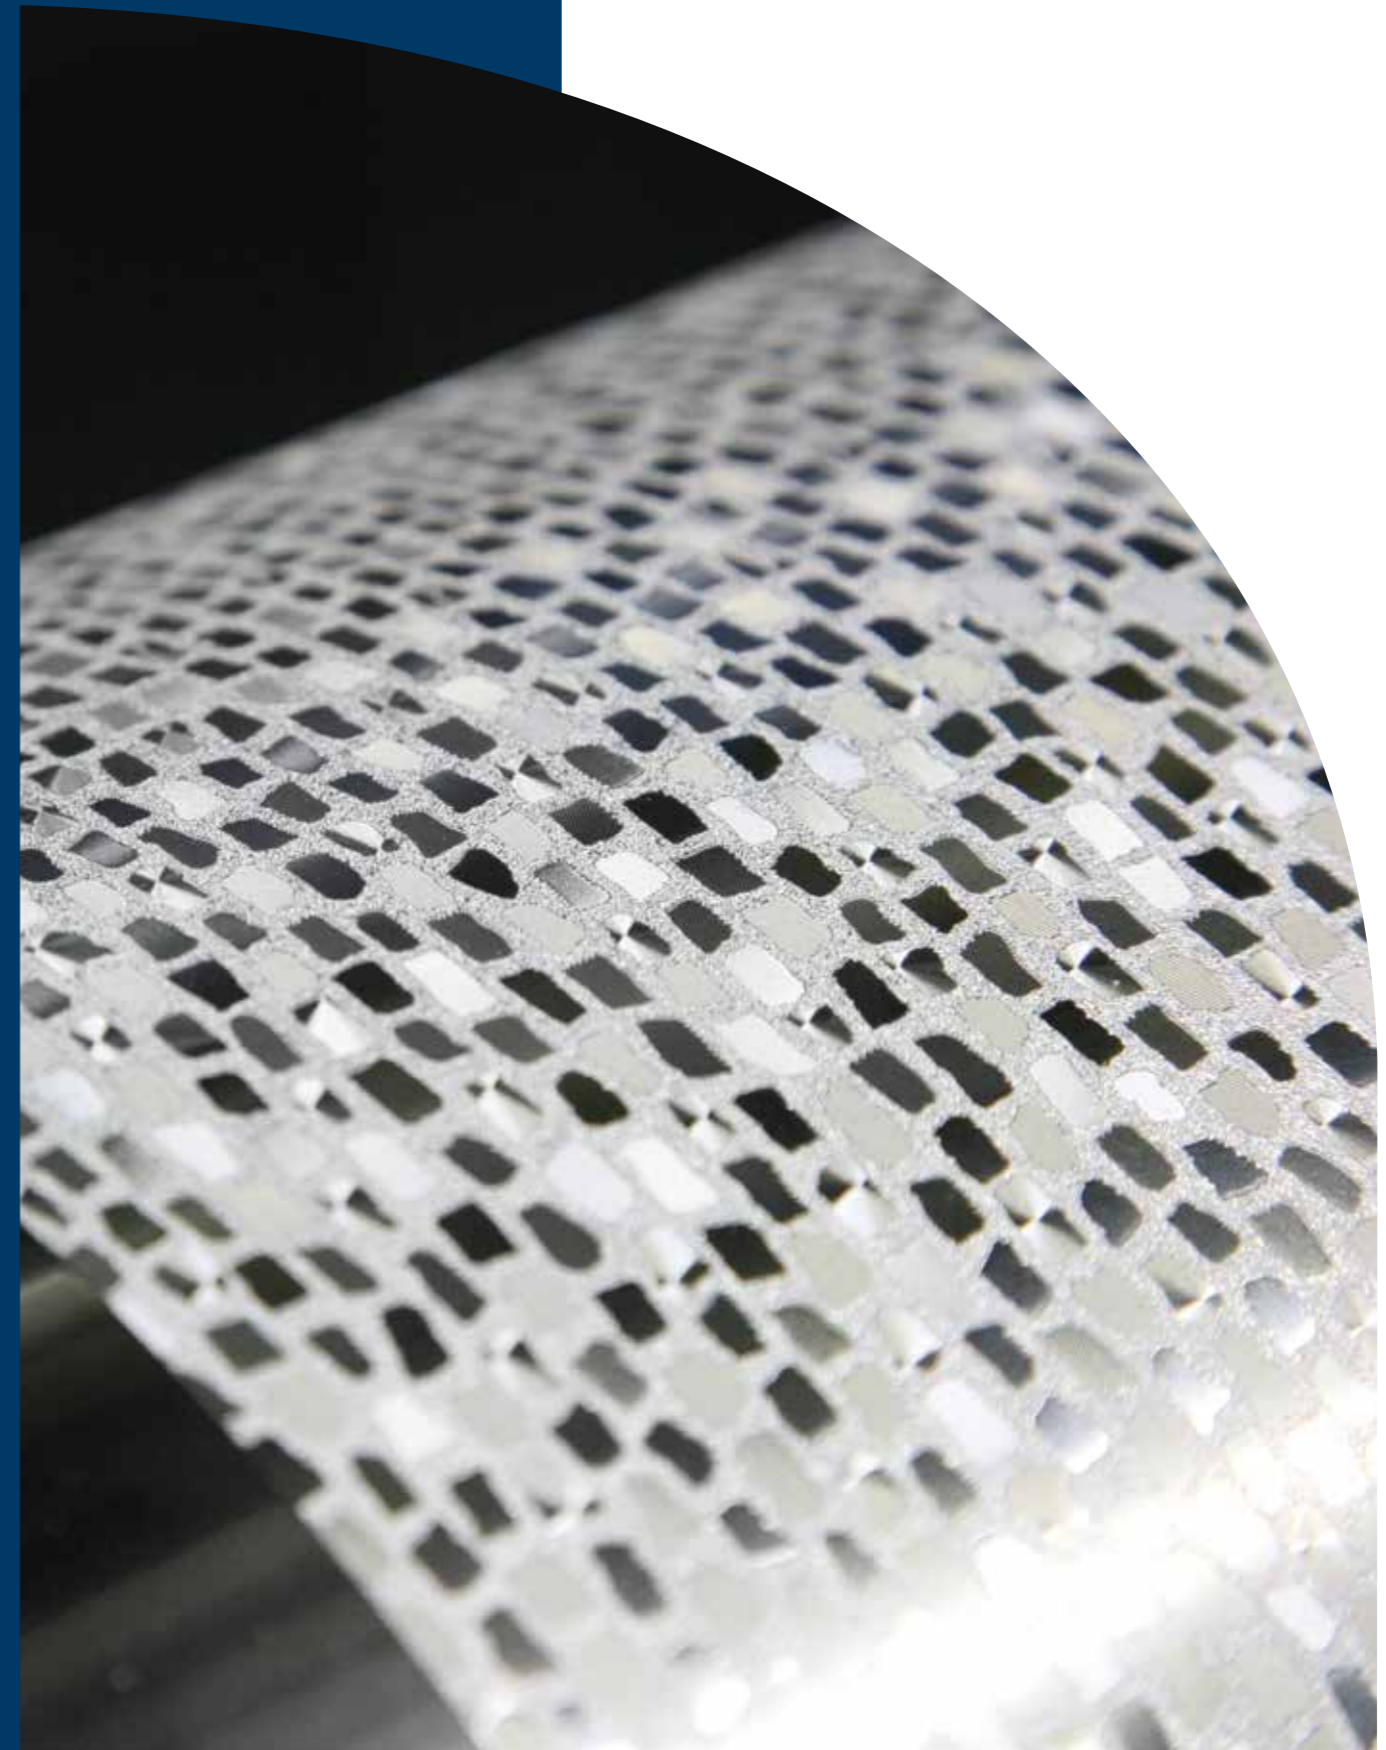

Embossing rollers & sleeves

We produce tailor-made embossing rollers and sleeves with the latest laser and etching technologies. This enables us to precisely reproduce even the smallest structures.

Technical centre

Our in-house technical centre provides the opportunity to produce sample collections on your original materials.

We trust in **international group strength**

As part of Matthews International Corporation, we belong to a strong global network. Therefore we guarantee an excellent development, implementation and coordination of international projects at any time. We are a reliable partner for your business operations across all borders.
