

ingenio gravio 90200

Laboratory Gravure printing machine with pneumatic drive. Includes variable speed and contact pressure settings. The ideal device for testing printing inks and coatings and their print or coverage results on various substrates.

- Flatbed print surface
- Multilayer printing
- 3-5 ml ink per print
- Customized printing cylinders
- Quick change printing cylinders
- Simple cleaning process

Technical data

Printing cylinder

Diameter: 90 mm

Cylinder width: 200 mm

Maximum printing width: 175 mm

Maximum printing height: 282.74 mm

Substrate

Material width: 180 mm

Material length: 1200 mm

Cylinder rotations

3 cylinder rotations

Speed

10 m to 40 m/min

Air pressure

6 bar to 8 bar
